Container Pumps

Safety is our Concern

Lutz – the Development

Decades of innovative and convincing pump technology

1954

The company is founded by Karl Lutz.

1963

Explosion-proof motor for drum pumps, approved by the PTB*, Braunschweig.

1972

The product innovation – a sealless pumping unit.

1987

The first pumping unit worldwide for complete drum drainage.

1988

The new MA/ME generation of motors: Safety standards that are state of the art even today.

1990

EMIGA emission-proof drum adapter for enhanced safety and health protection at the work place.

1990

The first compressed air motor worldwide in a flameproof enclosure with an explosion-protection classification of Ex d IIC T6.

1993

Modular flow meter system for efficiency and accurate measurement.

1994

Compressed-air-operated oil-free double diaphragm pumps extend the range of products.

2000

New development of a container pump for a safe transfer of chemicals.

2000

New development of a flameproof relay module for flow meters.

2001

Complete pump sets provide enhanced service and a high degree of customer-friendliness.

2001

Centrifugal pumps – easy circulation even in heavy-duty applications.

2001

Certification of all the motors, pumping units and flow meters for compliance with Atex.

2004

HDO Flow meter series for thin bodied to highly viscous fluids.

2006

Complete pump systems for the transfer of alternative fuels and additives from drums and containers.

2007

Lutz B2 Vario pump for the laboratory and research sector.

2010

Battery powered laboratory pump Lutz B1 for convenient and safe transfer of small liquid amounts.

2011

Lutz B70V Sanitary: Designed according to the latest directives for the high requirements of the food, beverage, pharmaceutical, and cosmetics industry.

2012

The new Lutz Flow Meter Series: In Touch with the Future.

For complete drum and container drainage	48-57
For mixing and pumping	58-67
For emptying of containers	68-71
Suitable accessories	72-93

Jürgen Lutz

Consistent customer orientation

You can expect no less of us

Concern for safety and reliability plus responsible response to change have been the underlying factors which have helped us become an internationally successful company. Our faithful adherence to these concerns in fulfilling the needs of our customers has provided and will continue to provide the bedrock for sound innovative ideas.

Lutz is the reliable partner in the field of professional liquid handling. As supplier of innovative and high quality pumps and pump systems we support our customers in finding the adequate solution for their fluid handling requirements. Our products as well as our sales and service network contribute worldwide to a safe handling of fluids and the protecting of our environment.

We would be pleased to discuss with you any special requirements.

Sincerely yours,

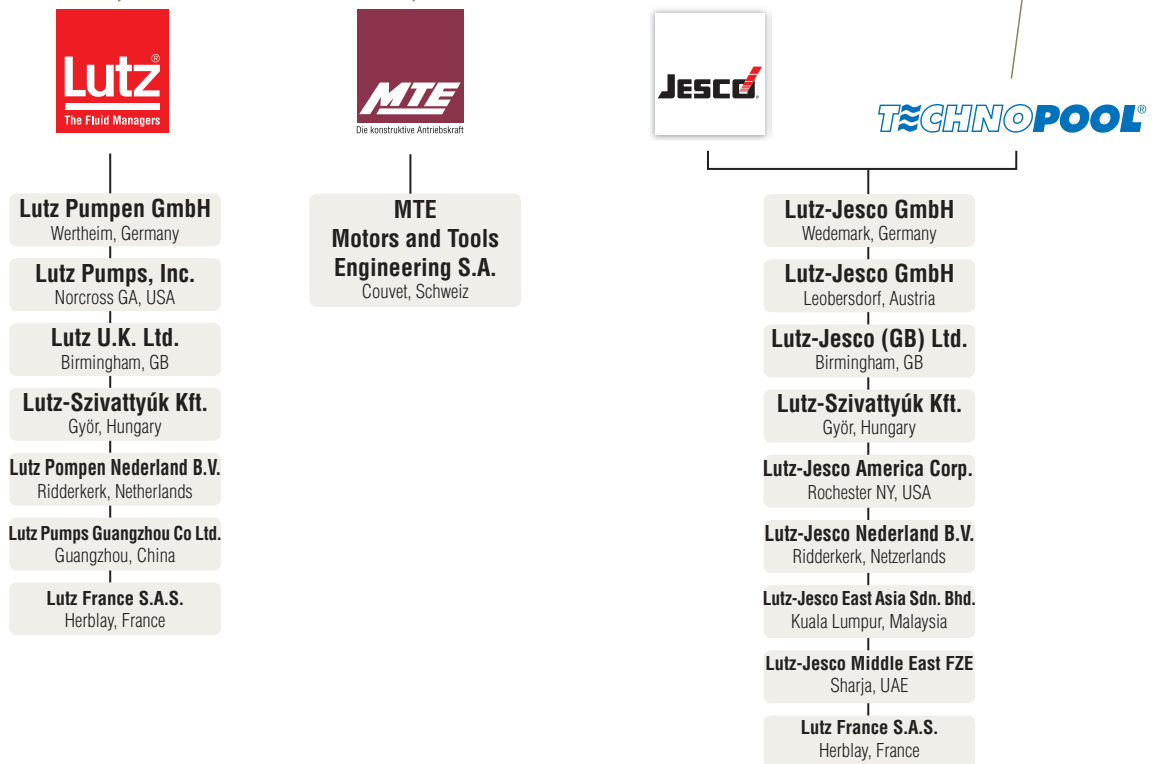

Enhanced safety

with Lutz

The Holding Structure

A clear concept

Retain what is good, be open to innovative ideas.

The Lutz Holding GmbH has its own subsidiaries in the USA, the UK, the Netherlands, France, Switzerland, Austria, Hungary, Malaysia, China and the United Arab Emirates. Through its distribution Lutz is represented in more than 80 countries worldwide.

Professional competence and various services within the companies of the Lutz group provide clear advantages and benefits to our customers. Today, the

company offers complex solutions for fluid handling, and even more. The fusion of selected enterprises considerably enlarges the product range. Additionally, the synergies resulting from the interfirm cooperation between Lutz Pumpen GmbH and MTE with Lutz-Jesco GmbH offer the customers interesting perspectives, too. Since 2003, the brand Technopool is adding water treatment equipment for pools to the product line.

The Best you can do:

Decide on Lutz

Save time and money with Lutz

Not only the price/performance ratio is outstanding, the costs of maintenance are even better: With Lutz pumps you maintain durability.

Reliable and solid

High quality materials and a proven design guarantee a long service life and a minimum of downtime.

Confidence in tried and tested quality

Personal, product and customer training, certification in compliance with DIN EN ISO 9001 and accurate inspection and testing of every single unit guarantee that you are always on the safe side.

Environmental protection is our primary concern

Environment consciousness is our primary concern. For this reason, Lutz does not "do things by halves". Complete drum drainage, pump tubes without a need for grease and gas displacement devices are a matter of course. EMIGA, the special emission-proof drum adapter by Lutz offers maximum health and environmental protection when handling hazardous material.

Service with system

Lutz pumps have hardly no wear parts, the systems are easily detachable and compatible, everything is documented – but nevertheless if service is needed, a world-wide service net and an extensive inventory ensure you that everything gets under way as fast as possible.

A tight grip on the future

With Lutz pumps you remain mobile and stay flexible for your future needs: The modular construction allows for a number of combinations.

Lutz – and our customers will always be on the safe side

Operational safety is the most essential thing. Lutz pumps have been approved for compliance with established standards and directives. They comply with all requirements laid down by ATEX, UL, PTB, VDE and CE.

Easy operator control through "punch and pump"

Unpack and get started: Lutz pumps systems are absolutely user friendly constructed, easy to clean and flush and if necessary can be disassembled/reassembled in minutes. A convenient hand wheel attaches the motor to the pump tube – connect and disconnect in seconds with no tools. The hand wheel serves as carrying handle at the same time.

Lutz provides comprehensive solutions

Irrespective of whether you want a complete set or a customised unit – Lutz provides solutions that are well-suited. A matching range of accessories guarantees efficient and safe operation in all areas of application.

Lutz Pump Sets

A quick solution for many applications

Fast assembly

Only few simple operations required

Immediately ready for use

Lutz pump sets save time and money. The annoying search for the ideal pump with suitable accessories has come to an end. Lutz is now offering you a choice of different pump sets. Optionally, the pumps can be combined with a flow meter. Thus, ordering is simple and you save time for the essential things.

Advantages at a glance:

- ✓ Ideally harmonised with the liquid being pumped
- ✓ Fast assembly
- ✓ Immediately ready for action
- ✓ Ideal for pumping and filling thin-bodied liquids
- ✓ Different pump sets for selection
- ✓ For emptying of canisters, drums and containers

Already pre-assembled

Immediately ready for action. Just delivered, you can start with the new pump sets from Lutz to empty thin-bodied liquids from canisters, drums and containers. We have made preparatory work saving your time.

Ideal combination

Whether acids or alkalis, light or concentrated, mineral oil products, hazardous fluids or solvents:

Lutz offers for all these applications the ideal solution.

More time for the essential things

Lutz Pump Sets

Motors

Powerful universal
and compressed
air motors

Drum adapter

For safe fixing the pump in the drum opening

Nozzles

for safe filling and
transferring of liquids

Hoses

Resistant to the pumped medium,
with practice-orientated 2 m hose

Pump tubes

Resistant to the pumped medium,
in different lengths, for emptying
of canisters, drums
and containers

Lutz Pump Sets

1 Pump Set Lutz B2 Vario (Polypropylene)

For thin-bodied fluids

such as battery acid, ammonia solution, photographic developer/-fixer, glycols, phosphoric acid, hydrochloric acid and hydrogen peroxide.

For filling small quantities from hobbcocks, canisters and drums.

- **Motor Lutz B2 Vario**,
200 W internally ventilated

Density (kg/dm ³)	Viscosity (mPas)	Delivery rate (l/min.)	Delivery head (m wc)
1,3	300	75 (22)	7

Max. temperature of medium 50 °C

Specified values are maximum values determined with water at 20°C, measured directly at the pressure joint. Viscosity determined with oil. When using a nozzle the delivery rate is reduced to approximate values (see brackets).

For emptying canisters and drums			Pump Lutz B2 Vario*	Pump Set Lutz B2 Vario
	Imm. depth	500 mm	Order No. 0201-500	0205-020
	Imm. depth	700 mm	Order No. 0201-501	0205-021
	Imm. depth	1000 mm	Order No. 0201-502	0205-022

Pump Set: **Pump Lutz B2 Vario** polypropylene, 1.5 m PVC spiral hose 3/4", Lutz-nozzle, hose clamps, wall bracket.

*Pump B2 with hose connection PP 3/4"

More time for the essential things

2 Pump Set Lutz B2 Vario (Stainless Steel)

For thin-bodied fluids

such as oil-based lubricants, cleaner solvent, plasticizer.

For filling small quantities from hobbocs, canisters and drums.

- **Motor Lutz B2 Vario**, 200 W internally ventilated

Density (kg/dm ³)	Viscosity (mPas)	Delivery rate (l/min.)	Delivery head (m wc)
1,3	300	68 (22)	6,5

Max. temperature of medium 90 °C

Specified values are maximum values determined with water at 20°C, measured directly at the pressure joint. Viscosity determined with oil. When using a nozzle the delivery rate is reduced to approximate values (see brackets).

6 Pump Set „Mineral Oil Products“

For light viscous mineral oil products

such as Diesel, fuel oil, hydraulic oil, machinery oil and motor oil.

- **Motor MI-4**, 500 W internally ventilated or optionally with
- **Compressed air motor MD-1**, 400 W / 6 bar with stop valve and nipple

Motor MI-4
Universal motor for individual application. For aggressive and non-flammable liquids. Strong when handling mineral oil products.

Motor MI-4

Density (kg/dm ³)	Viscosity (mPas)	Delivery rate (l/min.)	Delivery head (m wc)
1,4	500	87 (50)	19

Motor MD-1

(For high viscous oils suitable Eccentric Screw Pumps are available, see separate leaflet)

Lutz Pump Sets

7 Pump Set „Solvents“

For easily flammable hydrocarbons

such as ethanol, gasoline, butanol, isopropanol, kerosene, methanol and petroleum.

- **Motor ME II 3**, 460 W or optionally with
- **Compressed air motor MD-2**, 400 W / 6 bar

Explosion proof according to ATEX Directive 2014/34/EU, category 2.

Motor ME II 3

The **explosion proof** universal motor ME II 3 is ideally suitable for transferring of many thin-bodied, easily flammable and combustible liquids.

Pump Set Solvents

with motor ME II 3 or MD-2

Lutz Battery Pump B1 for Laboratories

Mobile and user friendly

Convenient and safe transfer of small liquid amounts

Environmental protection, safety, energy and cost consciousness and easy handling: the demands which a pump has to meet are growing more and more. At Lutz, we have met this challenge and have completed our delivery program for a battery-powered pump series which lives up to these expectations. The Battery Pump B1 – which is also available as a complete pump set with accessories – incorporates the reliable and tested drum pump technology. This pump type was developed for applications where small amounts of liquids have to be filled from different containers like small cans up to 200-l-drums.

For each application the right solution from Lutz

With the battery-powered laboratory pump B1 and the electrical-powered pump B2 Vario, Lutz offers to the market a successful duo which is ideally suitable for a convenient and safe transfer of liquids in the laboratory and research sector or whatever industry you are in.

The battery charger can be used as table unit or can be mounted onto the wall.

Pump set immediately ready for use. With 1.5 m PVC-hose and hose nozzle.

Safe and simple in everyday practice

Top Performance in a compact design

- ✓ Reliable and tested drum pump technique
- ✓ Modular design
- ✓ Infinitely variable speed controller for comfortable and safe filling applications
- ✓ Ergonomical design for easy handling
- ✓ Optimized complete drum drainage
- ✓ Sophisticated battery system
- ✓ Battery charger as wall bracket for safe storage
- ✓ Chemical-resistant
- ✓ Easy to service

Immediately ready for use – only few simple operations required

Remove the motor from the charging station

Connect the motor with the pump tube

Open the nozzle and fill up the requested liquid amount infinitely variable

Battery Pump Set B1 comprises:

Battery motor 9.6 V, pump tube polypropylene Ø 25 mm, 1.5 m PVC-hose DN 12 and hose nozzle

Lutz Drum and Container Pumps

Lutz B2 Vario: Perfect for the laboratory and research sector

Lutz B2 Vario stands for: Versatile, maximum possible safety, and optimum price-performance ratio.

The innovation for increased safety and ease of use

Environmental protection, safety, energy and cost consciousness and easy handling: the demands which a pump has to meet are growing more and more. Simplicity and ease of handling must be inherent characteristics as well.

At Lutz, we have met this challenge and have developed a pump which lives up to these expectations. The electric drum and container pump **Lutz B2 Vario** incorporates a reliable and tested technique together with a number of functions providing perfect fluid management solutions, whatever industry you are in.

The advantages of the B2 Vario:

- ✓ **Variable speed motor** with safety cut out to enable the transfer of liquids in small amounts
- ✓ Easy and safe to operate by integrated ergonomically designed handles and nozzle
- ✓ Ultra quiet, long service life
- ✓ **Different lengths** available 500, 700 and 1000 mm for the use in small vessels up to 200 litre drums
- ✓ Sealless, lube free pump tube, thus no contamination of the liquid
- ✓ Wide range of applications possible due to sealless construction
- ✓ Available in **polypropylene, polyvinylidene fluoride** and **stainless steel** (1.4571)

Mounted hanger for storing nozzle and cable at the pump. Service-friendly construction, simple to dismantle and improved complete drainage function.

Lutz B2 Vario: (polypropylene or stainless steel)

The perfect solution to transfer small amounts of liquid

Safety First

Personal safety and the environment are of vital importance when it comes to handling chemicals, acids, alkalis or other dangerous liquids, particularly when transferring small amounts of liquid. The "Lutz B2 Vario" provides a complete solution. The infinitely variable speed controller with integrated on/off switch allows a controlled and comfortable filling of smaller and larger liquid amounts. The operator can gradually regulate the delivery rate from lowest up to requested speed by one movement of the hand.

Lutz Drum and Container Pumps

Your individual pump selection

Safety first

The explosionproof models of Lutz drum pumps provide optimum protection when handling easily inflammable, combustible material and when working in potentially explosive environments. The drum pumps are made of stainless steel (1.4571) and Hastelloy C. They comply with all the international standards and provisions as well as with the directives according to Atex 2014/34/EU and IEC Ex.

Lutz drum and container pumps are always the right choice.

The right solution for each and every liquid

We have the pump suited to any liquid to be pumped – without compromise. Acids and alkalis have no impact on polypropylene and PVDF drum pumps. Aluminium pumps ensure unrestricted flow of diesel and oil. Stainless steel is particularly suitable for corrosive and neutral liquids, it proves especially useful in the pharmaceuticals and food industry. Hastelloy C, which is extremely resistant, does not stop at highly aggressive acids or alkalis. Your choice is not restricted to the type of impeller. Lutz drum pumps are available as sealless versions and as well as versions with mechanical seals.

Lutz Drum and Container Pumps

in PURE Version

Lutz Drum and Container Pumps PURE version

Pumps and flow meters in contact with food products are considered to be “food contact materials” and are thus subject to strict legal regulations.

The new Lutz PURE series includes products which are in accordance with ATEX Directives as well as with FDA Regulation and European Regulation according to 1935/2004/EC.

NEW

- ✓ Physiologically safe type
- ✓ High surface quality
- ✓ Food-safe connections
- ✓ Not filled with lubricants, preventing product contamination
- ✓ Also for alcoholic food products, cosmetics and pharmaceuticals and flammable cleaning products

EC 1935/2004

The “food safe” sign or “glass and fork” symbol stands for suitability for foodstuffs. This symbol denotes products which were tested to determine their physical and chemical composition and have been found to be safe for contact with food in accordance with the requirements of Regulation (EC) 1935/2004.

The Food and Drug Administration in the USA certifies materials and substances and also defines limit values for extractable substances which must be complied with, as is the case with elastomers for aqueous or fatty food products (21 CFR 177.2600).

Lutz pumps from the PURE series are also available in an explosion-proof version in accordance with ATEX Directive 2014/34/EU. They are well-suited for pumping highly flammable media in food and beverage production, such as alcohols, essential oils and flavourings, as well as cleaning products and disinfectants used for cleaning purposes.

The frequently used universal solution

Pump tubes: PP/PVDF/ALU

Due to their carefully adapted material combinations, the modular Lutz pump tubes are suitable for almost all applications, in which thin-bodied and slightly viscous liquids need to be pumped. PP and PVDF are ideally suited for acids and alkalis, aluminium is particularly well suited for oil and cooling lubricants.

Excellent design: Almost anything is possible

Once again, the focus is on a broad range of applications—hence the modular design. The design of the pump tubes permits a sealless version of the pump tube as well as a version with mechanical seals. The sealless versions do not feature any seals that come into contact with the medium—not even O-ring seals. In the version with mechanical seals, the drive shaft is secured with one mechanical seal with two shaft seals behind it. Depending on your requirements, the impeller is optimised either with regard to the delivery rate or the pumping head.

We use our intelligence: Smart material selection

We select the materials with regard to the applications. PVDF offers the highest degree of chemical resistance. There are no grease fillings in the shaft tube, so there is no way that the fluid to be pumped can be contaminated. All the models are equipped with universally resistant PTFE slide bearings.

Logical decision: Service-friendly design

Maintenance without the need for special tools—that's what we call service-friendly. The pump tubes boast a straightforward and coherent design. The motor can be disconnected quickly through the convenient hand wheel that is also used as a carrying handle.

How economical can you get?

A large number of standard components help save resources and keep inventory costs at bay.

Two-to-one for your success: one pump tube, two sealing systems

Everything well thought out

These models are convincing in their simple design of the connecting head, of the T-fitting and of the pump tube. They guarantee a high degree of resistance and minimum wear, and thus an extended service life.

High quality – for you!

The metal connecting head with an exceptionally corrosion-resistant coating enhances the heat dissipation of the bearing friction. The outer tube is extremely rigid due to thick walls. You can select either a stainless steel or Hastelloy C drive shaft.

Assembly and replacement made simple

Save time and money. The sealing modules of the pumps with mechanical seals (MS) and of the sealless pumps (SL) can be replaced rapidly and conveniently—should they be worn. It is possible at any time to convert a pump with mechanical seal to a sealless pump. No additional modifications are required. The robust pump foot (model R or L) is easy to detach.

Practically indestructible

The double high-quality PTFE shaft bearing guarantees a long service life of these pumps.

German Patent:

DE 196 14 350 C2

Untiring: Lutz Pump Tubes

Pump tubes: Stainless steel/Hastelloy C

Untiring: Pump tubes: Stainless steel/Hastelloy C

These "universal geniuses" don't take offence easily: robust Lutz pump tubes for a vast range of applications, even with extensive mechanical stress. Ideally suited for thin-bodied to slightly viscous liquids.

The pump tubes stainless steel are suited for delivering neutral and aggressive, easily inflammable and non-inflammable liquids. HC is used especially for highly aggressive, easily inflammable chemicals.

Tried and tested a thousand times in practice

In this case, a broad range of applications was the primary objective of the design engineers. The sealless version does not feature any seals that come into contact with the medium. In the version with mechanical seals, the drive shaft is secured with one mechanical seal with two shaft seals behind it.

The material is what matters

Stainless steel pump tubes feature an extremely resistant pure carbon bearing, Hastelloy C pump tubes feature an extremely resistant ceramic bearing. Another benefit: There are no grease fillings in the shaft tube, so there is no way the fluid to be pumped can be contaminated.

New: Stainless steel pump tubes in PURE version. All materials coming into contact with the pumped fluids are physiologically safe. The pump tubes are mainly used in the food-, cosmetics and pharmaceutical industry.

SS

HC

When does one have to use an explosionproof pump, when not?

Several factors play a role where safety is at stake. The liquid to be delivered, the circumstances of the delivery and the environment.

Explosion protection measures are imperative for flammable liquids belonging to explosion group II (according to EN/IEC 60 079-0).

The hazard imposed by the gases increases from explosion group II A and II B to II C. Accordingly, the demands placed in the operating appliances used for these explosion groups also rises.

Of course, this is the reason why operating appliances, for example, which are approved for II C, are also usable for all other explosion groups.

Caution!

A pump tube with an explosionproof motor must be used for easily inflammable liquids. Refer to page 32

Some examples:

Group II A: e.g. acetone, gasoline, toluene
Group II B: e.g. ethene, ethylene oxide, diethyl ether

Group II C: e.g. acetylene, hydrogen, carbon disulfide

Pump Power: Range of Motors

MI 4/MI 4-E

Double insulation in keeping with type of protection class II, splash water protected in keeping with IP 24, double-pole ON/OFF switch and single-pole thermal overcurrent release. 5-m connection cable with plug. Not explosionproof.

- ✓ Light and convenient
- ✓ Powerful
- ✓ Good price/performance ratio
- ✓ Optionally available with speed controller

Undemanding universal motor designed for industrial applications and suitable for pumping thin-bodied, slightly viscous, neutral, aggressive and non-inflammable fluids. It demonstrates its power even when handling acids and alkalis.

More information see below.

Everything under control: MI 4-E

The MI 4-E motor is additionally equipped with a speed controller. This ensures controlled filling and refilling of fluids at any time.

We recommend the use of the MA II 5-S motor for extremely aggressive environments.

Typ	Voltage V	Frequency Hz	Output W	Weight kg	Order No. (with Low-voltage release)	Order No. (without low-voltages-release)

MI-4-100 E	100	50-60	520-550	2.8	-	0030-008

MA II

Double-pole ON/OFF switch, splash water protected in keeping with IP 54, single-pole thermal overcurrent release. 5-m connection cable with shock-proof plug. Not explosionproof

- ✓ Robust, rigid design
- ✓ Double insulation with protective conductor connection
- ✓ Integrated low voltage release (option)
- ✓ Optimised cooling air conduction
- ✓ Externally cooled
- ✓ Double wall housing
- ✓ Available in three power ratings

The convenient and powerful MA II universal motors are ideal for pumping thin-bodied to slightly viscous, aggressive and non-inflammable fluids.

Double protection is even better

Robust and durable: The inner part of the double wall housing is made of aluminium, the outer part is made of special acid-proof plastic. Aggressive and corrosive vapours cannot intrude into the inner part of the motor. The air flow for cooling the motor is conducted between the two walls of the housing.

Safety and protection

A low voltage release prevents uncontrolled starting of the motor. There is double insulation between the live parts and the outer surface of the motor and the pump tube that can be touched.

Acid-proof version: The indestructible

The acid-proof motor version MA II 5-S is armed against all types of "aggression". The motors feature a metal housing with a special anti-acid coating, a plastic shell and additional sealing of the inner part of the motor.

MD-1

MD-2

MD-3

Overload-proof and explosionproof compressed air motor. 400 W at an operating pressure of 6 bar. Air consumption approx. 0.88 Nm³/min (unconfined air). Operating range of from 3 – 6 bar. Low-noise operation through muffler.

- ✓ Explosionproof
- ✓ Overloadproof
- ✓ Compact design
- ✓ Delivery flow is easy to control
- ✓ Optionally with/without manual operation

MD compressed air motors

Especially in environments, in which electricity may constitute a hazard. The compact MD compressed air motors automatically adjust to the respective load. Ideal for handling thin-bodied, aggressive, slightly viscous and easily inflammable liquids assigned to explosion groups II A, II B and II C.

MD-3: Play it safe

The first compressed air motor in an explosionproof enclosure. Flashback arresters, spring loaded spherical safety relief valves, plastic rotors and extremely long threads guarantee even more safety when pumping easily inflammable liquids. This virtually eliminates operating errors.

Trio grande: The models

Three different versions of the MD compressed air motors are available: MD-1 without manual operation for automatic control. MD-2 with manual operation and interlock. MD-3 with on/off pushbutton. Approved according to ATEX Ex II 2 G.

Type	Betriebsdruck W	Output W	Weight kg	Order No.

MD-3	6	400	2.1	0004-090

B4/GT three-phase gear motor

CE IP 54/IP 55

Three-phase gear motor, 0.75 kW, 230/400 V, 50 Hz, efficiency level IE 2. With terminal box or attached motor protection switch with ON/OFF function.

- ✓ Especially smooth and quiet operation
- ✓ Special models available

The B4/GT has a proven record of success in plant construction and as a drum pump drive. The perfect system for thin-bodied to slightly viscous liquids. These "undemanding" partners hardly ever show signs of wear. The ideal solution for long periods of operation.

A wide range of capabilities

The B4/GT motor is suitable for stationary applications with terminal box and external

protection switch in the control cabinet and equally well as a mobile multi-talent – in this case with a protection switch attached.

Absolutely undemanding

The flange mounted single-stage gears are oil-lubricated and extremely easy to maintain.

Type	Voltage V	Frequency Hz	Output W	Weight kg	Order No. (cable terminal box)	Order No. (protection switch)
B4/GT	230-400	50	750	10.0	0004+019	0004+067

Pump Power: The motors ME II

ME II

Explosionproof in compliance with II 2 G Ex de IIC T 5 or T6. Double-pole ON/OFF switch, splash water protected in keeping with IP 54, double-pole thermal overcurrent release. 5 m connection cable with safety plug (not explosionproof), optionally available with explosionproof plug.

- ✓ Explosionproof in compliance with Atex and IEC Ex
- ✓ Low voltage release by default
- ✓ Optionally available without low voltage release
- ✓ Double isolation with protective conductor connection
- ✓ Optimised cooling air conduction
- ✓ Externally cooled
- ✓ Double wall housing
- ✓ Available in four power ratings

These motors aren't taken aback easily. The ME II explosionproof universal motor is the answer (German Patent DE 38 15427 C2) for pumping a large variety of thin-bodied, easily inflammable and combustible liquids..

Double walls provide optimum protection

The inner part of the double wall housing is made of aluminium, the outer part is made of special acidproof, non-conducting plastic. This prevents aggressive and corrosive vapours from intruding into the inner part of the motor. The air flow for cooling the motor is conducted between the two walls of the housing.

Tested quality and safety

Complies with the European Standards EN/IEC 60 079-0, EN/IEC 60 079-1 and EN/IEC 60 079-7, explosionproof in compliance with II 2 G Ex de IIC T5 or T6 and built and approved in keeping with the explosion protection Atex Directive 2014/34/EU and IEC Ex.

A low voltage release prevents uncontrolled starting of the motor. All the motors of the ME II series feature a protective conductor connection. There is double insulation between the live parts and the outer surface of the motor that can be touched as well as between the live parts and the pump tube. This guarantees protection against spark discharge during potential equalisation, specially in explosive areas.

Some like it hot

Lutz explosionproof drum pumps

Power

Our extensive range of motors comprises explosionproof compressed air and electric motors. Both the motor and the pump tube are approved as explosionproof in keeping with Atex Directive 2014/34/EU, since the motor and the pump tube form an integral assembly.

Handy and convenient

In the case of explosionproof pumps, the motor and the pump tube are also connected and disconnected in no time at all via the hand wheel. The hand wheel is also used as a carrying handle.

Safety benefits from experience

For more than 50 years, explosion protection has played a major role in the philosophy of our company. This stands for experience that you - as a planner and operator - can trust. In 1963, Physikalisch-Technische Bundesanstalt (PTB) granted Lutz the first approval for an explosionproof drum pump. Today, motors and pump tubes are subject to Atex Directive 2014/34/EU. The motors and pump tubes are each awarded their own certificate. Lutz - as the manufacturer, certifies this through the EC Declaration of Conformity.

Explosion protection is a

matter of public concern!

The manufacturer is not the only one responsible for ensuring that all the requirements of the explosion protection directive are met. The plant operator is equally responsible. The commissioning regulations depend on the intended use of the pump. Apart from this, every country has its national regulations with which the plant operator must comply in everyday practice - for his own safety and the safety of his employees.

* Determined with water at 20 °C
** Determined with oil

*** Special lengths 200–2500 mm on request

**** Determined with 3 m hose 3/4" and open nozzle 3/4". Higher densities possible for shorter operating periods.

Special voltages and frequencies on request.

Pump Tube PP (polypropylene)

for corrosive and neutral liquids

Materials (coming into contact with the pumped medium):

Version:	SL	MS
Housing:	PP/PVDF	PP/PVDF
Impeller:	PP	PP
Seals:	none	FPM
Mechanical seals:	none	Carbon, SiC, FPM, HC-4 (2.4610)
Bearing:	ETFE/PTFE	ETFE/PTFE
Drive shaft:	Stainless steel (1.4571) or HC-4 (2.4610)	Stainless steel (1.4571) or HC-4 (2.4610)

Please remember that the flow rate is reduced as the **viscosity** increases. The **density** of the pumped liquid similarly affects the flow rate, though to a lesser extent.

Accessories
hose connection
see page 79

With selected accessories (see page 92) the pump tube also can be used for pumping cold-pressed rapeseed- and vegetable oils.

Suitable range of accessories
see pages 76-92

Lutz Drum and Container Pumps

Low-voltage release (LVR):
Prevents the pump from starting up again without warning after a power failure. It is recommended when pumping hazardous liquids.

*Determined with water at 20 °C
** Determined with oil

*** Special lengths
200–2500 mm on request

**** Determined with 3 m hose 3/4" and open nozzle 3/4".
Higher densities possible for shorter operating periods.

Special voltages and frequencies on request.

Pump Tube SS (stainless steel)

for corrosive and neutral liquids

Materials (coming into contact with the pumped medium):

Version:	SL	MS	SL PURE	MS PURE
Housing:	SS (1.4571)	SS (1.4571)	SS (1.4571)	SS (1.4571)
Impeller:	ETFE	ETFE	PP	ETFE
Seals:	none	FPM	none	EPDM, FPM
Mechanical seal:	none	Carbon, Ceramic, FPM, Stainless steel	none	Carbon, Ceramic, FPM, EPDM, Stainless steel
Bearing:	Pure Carbon	Pure Carbon	Pure Carbon	Pure Carbon
Drive shaft:	SS (1.4571)	SS (1.4571)	SS (1.4571)	SS (1.4571)

Please remember that the flow rate is reduced as the **viscosity** increases. The **density** of the pumped liquid similarly affects the flow rate, though to a lesser extent.

Accessories
hose connection
see page 79

With selected accessories (see page 92) the pump tube also can be used for pumping cold-pressed rapeseed- and vegetable oils.

Pump tube also available in PURE version with Tri-Clamp connection. All materials coming into contact with the pumped medium are physiologically safe. The pump tubes are mainly used in the food-, cosmetics- and pharmaceutical industry. Additional costs see price list.

Suitable range of accessories
see pages 76-92

Low-voltage release (LVR.):

Prevents the pump from starting up again without warning after a power failure. In the hazardous location, motors with low-voltage release are absolutely precribed.

* Determined with water at 20 °C *** Special lengths 200–2500 mm on request
 ** Determined with oil

**** Determined with 3 m hose 3/4" and open nozzle 3/4". Higher densities possible for shorter operating periods.

Special voltages and frequencies on request.

Pump Tube SS (stainless steel)

for highly inflammable liquids

Materials (coming into contact with the pumped medium):

Version:	SL	MS	MS PURE
Housing:	SS (1.4571)	SS (1.4571)	SS (1.4571)
Impeller:	ETFE	ETFE	ETFE
Seals:	none	FPM	FPM, EPDM
Mechanical seals:	none	Carbon, Ceramic, FPM, Stainless steel	Carbon, Ceramic, FPM, EPDM, Stainless steel
Bearing:	Pure Carbon	Pure Carbon	Pure Carbon
Drive shaft:	SS (1.4571)	SS (1.4571)	SS (1.4571)

Please remember that the flow rate is reduced as the **viscosity** increases. The **density** of the pumped liquid similarly affects the flow rate, though to a lesser extent.

Pump tube also available in PURE version with Tri-Clamp connection. All materials coming into contact with the pumped medium are physiologically safe. The pump tubes are mainly used in the food-, cosmetics- and pharmaceutical industry. Additional costs see price list.

Suitable range of accessories see pages 76-92

Lutz Pump Tubes RE for complete drum drainage

In stainless steel and polypropylene

*Pump tube RE: Environmentally friendly and cost-efficient.
The first pump tube for complete drainage worldwide.*

Competitive edge instead of drawback

Experts, never tired of work:

Lutz pump tubes RE in stainless steel and polypropylene. Not only are they environmentally safe, they also help to save money. On the one hand, the liquid is used to the maximum, on the other hand, the cost for disposing of residuals is drastically reduced, since only the slightest residue remains in the containers.

Open to everything but absolutely leak-proof...

The power is transferred to the drive shaft via a flexible coupling that is sealed well and bedded in a shaft tube. The impeller feeds the liquid safely to the hose connection on top of the pump.

The sealing cap is open – the liquid is pumped out.

The closed sealing cap prevents a return flow when the pump is removed.

Patented solution

With the motor running, the pump foot is closed by lowering the sealing cap within the pump tube. The sealing cap locks the pump foot and prevents the entered liquid from flowing back into the drum. Closing is done in no time at all – carried out by a small lever below the hand wheel. With the motor switched off, the pump tube holding the liquid can be removed and inserted into the next drum. A development that has rightfully been patented.

German Patent:

DE 37 18325 C2

Down-to-earth technology

RE pump tubes for complete drainage feature a simple yet very convincing concept. Simple – and that is exactly why it is ingenious – since the integration of the RE concept offers considerable advantages. Due to their technology, these pumps guarantee maximum pump out of the fluid, literally draining the container "to the dregs". The residues amount to less than 0.10 l.

Residues less than 0.10 l

Pump Tubes for complete drum drainage

In polypropylene (PP) and stainless steel (SS 1.4571)

These pump tubes for complete drainage are suitable for applications, in which thin-bodied liquids need to be drained almost completely from drums and other containers. PP likes to demonstrate its capabilities in handling acids and alkalis. Stainless steel pump tubes have a way with aggressive, neutral, easily inflammable and non inflammable fluids.

Excellent design: Almost anything is possible

Like all components designed by Lutz, these pump tubes boast a straightforward and logic design. In the version with mechanical seals, the drive shaft is secured with a mechanical seal with two shaft sealing rings behind it. The motor can be disconnected quickly through the convenient Lutz hand wheel.

The material is what matters

We select the materials with regard to the liquids to be pumped. Both the pump tube models feature an extremely resistant pure carbon bearing and there are no grease fillings in the shaft tube, so there is no way the fluid to be pumped can be contaminated. The drive shaft is optionally available in Hastelloy C4 for use with acids and alkalis. Stainless steel pump tubes have FEP coated seals.

New: Stainless steel pump tubes in PURE version. All materials coming into contact with the pumped fluids are physiologically safe. The pump tubes are mainly used in the food-, cosmetics and pharmaceutical industry.

Important !

A stainless steel pump tube and an explosionproof motor with Atex certification must be used for pumping easily inflammable liquids. Please refer to pages 31-32.

Logical decision: Service-friendly design

Maintenance without the need for special tools – that's what we call service-friendly.

Small but very useful

Undemanding universal motor designed for industrial applications and suitable for pumping thin-bodied, slightly viscous, neutral, aggressive and non-inflammable liquids. It demonstrates its power even when handling acids and alkalis.

     IP 24

MI 4/MI 4-E

Lightweight but dependable

The convenient and powerful MA II universal motors. Ideal for pumping thin-bodied to slightly viscous, aggressive and non-inflammable liquids.

    IP 54

MA II

Safety first

These motors aren't taken aback easily. The ME II explosionproof universal motors are the nostrum (German Patent DE 38 15427 C2 - for pumping a large variety of thin-bodied, easily inflammable and combustible liquids.

 IP 54 

ME II

Trio grande: The models

Three different versions of the MD compressed air motors are available. MD-1 without manual operation for automatic control, MD-2 with manual operation and interlock, MD-3 with on/off pushbutton. Approved according to ATEX Ex II 2 G.

MD-1

MD-2

MD-3

MD-1/MD-2/MD-3 compressed air motors

Tip

For detailed information on the motors please refer to pages 30-32.

Reliable and powerful, thus suitable for extreme conditions

The B4/GT has a proven record of success in plant constructions and as a drum pump drive. The perfect system for thin-bodied to slightly viscous liquids. These "undemanding" partners hardly ever show signs of wear. The ideal solution for long periods of operation.

 IP 54/IP 55

B4/GT three-phase gear motor

	Order No.	0004+019		0004+067

Low-voltage release (LVR):
Prevents the pump from starting up again without warning after a power failure. It is recommended when pumping hazardous liquids.

* Determined with water at 20 °C *** Special lengths 200-2500 mm on request

**** Determined with 3 m hose 3/4" and open nozzle 3/4". Higher densities possible for shorter operating periods.

Special voltages and frequencies on request.

Pump Tube RE-SS (stainless steel)

for complete drum drainage of corrosive and neutral liquids

Materials (coming into contact with the pumped medium):

Version:	MS	MS PURE
Housing:	Stainless steel (1.4571)	Stainless steel (1.4571)
Impeller:	ETFE	PP
Sealing pot:	ETFE/Stainless steel (1.4571)	ETFE/Stainless steel (1.4571)
Seals:	FEP coated	EPDM
Mechanical seals:	Carbon, Ceramic, PTFE, HC-4 (2.4610), Stainless steel 1.4571)	Carbon, Ceramic, PTFE, HC-4 (2.4610), Stainless steel 1.4571)
Bearing:	Pure Carbon	Pure Carbon
Drive shaft:	Stainless steel (1.4571)	Stainless steel (1.4571)

Complete drum drainage

Nearly completely drained.
Residual quantity < 0.10 litres.

Please remember that the flow rate is reduced as the **viscosity** increases. The **density** of the pumped liquid similarly affects the flow rate, though to a lesser extent.

Accessories
hose connection

Pump Tube RE-SS (stainless steel)

for complete drum drainage of highly inflammable liquids

Materials (coming into contact with the pumped medium):

Version:	MS	MS PURE
Housing:	Stainless steel (1.4571)	Stainless steel (1.4571)
Impeller:	ETFE	ETFE
Sealing pot:	ETFE/Stainless steel (1.4571)	ETFE/Stainless steel (1.4571)
Seals:	FEP coated	FPM
Mechanical seals:	Carbon, Ceramic, PTFE, HC-4 (2.4610), Stainless steel 1.4571)	Carbon, Ceramic, PTFE, HC-4 (2.4610), Stainless steel 1.4571)
Bearing:	Pure Carbon	Pure Carbon
Drive shaft:	Stainless steel (1.4571)	Stainless steel (1.4571)

Tip
The right pump for "hot applications".

Please remember that the flow rate is reduced as the **viscosity** increases. The **density** of the pumped liquid similarly affects the flow rate, though to a lesser extent.

Pump tube also available in PURE version with Tri-Clamp connection. All materials coming into contact with the pumped medium are physiologically safe. The pump tubes are mainly used in the food-, cosmetics- and pharmaceutical industry. Additional costs see price list.

Suitable range of accessories see pages 76-92

Pump Tubes MP for mixing and pumping

Multi talent: Lutz pump tube MP for mixing and pumping

Simply double the reward: Lutz pump tubes for mixing and pumping

Some fluids take offence at being kept on hold. They will simply sediment. We are referring to numerous emulsions, dispersions and suspensions used in industrial and trade environments. This is not due to their impatience but to the different weight of the individual ingredients. The Lutz MP can cater for two needs, since it combines a mixer and a pump in one unit and is thus the ideal solution for "critical relationships" of this kind.

Universally Applicable

"Mixer" and Pump in a single unit

immerse

mix/pump

pump

Desired turbulences

The special flow conditions in the container generated by the pump tube for mixing and pumping thoroughly remix and homogenize sedimented media – even in remote corners of the container bottom. In a flash, you will have a homogenized mix ready for further processing.

All the functions in one go

A construction comprising an immersion tube and a locking mechanism that has been tried and tested in practice provides for opening and closing of the mixing apertures. This proven design facilitates simultaneous mixing and pumping. Of course, it's your choice: With the discharge connection closed, you can also mix first and pump afterwards. The pump tube functions are conveniently controlled by devices outside the drum.

Take advantage of a wide range of capabilities

Lutz pump tubes for mixing and pumping are available in stainless steel or polypropylene to match all kinds of chemical resistance requirements. Combined with a wide range of motors, they are capable of meeting a vast number of demands with respect to mixing and pumping inhomogeneous, aggressive and easily inflammable fluids.

Perfect fit

Lutz pump tubes MP for mixing and pumping are compact, that is exactly why they make it big: They have no problems at all fitting through the standardised bung hole of a 200-l drum. Simply push it in, fasten it using a drum adapter – and off you go!

Pump Tubes for mixing and pumping

In polypropylene (PP) and stainless steel (SS 1.4571)

These pump tubes for mixing and pumping are suitable for applications, in which thin-bodied liquids in drums and other containers need to be remixed and homogenised before being pumped. PP likes to demonstrate its capabilities in handling acids and alkalis. Stainless steel pump tubes have a way with aggressive, neutral and easily inflammable fluids.

Excellent design: Almost anything is possible

Like all components designed by Lutz, these pump tubes boast a straightforward and logic design. In the version with mechanical seals, the drive shaft is secured with a mechanical seal with two shaft sealing rings behind it. The motor can be disconnected quickly through the convenient Lutz hand wheel. If you want to mix only, a shut-off device must be provided on the discharge side.

The material is what matters

We select the materials with regard to the liquids to be pumped. Both the pump tube models feature an extremely resistant pure carbon bearing and there are no grease fillings in the shaft tube, so there is no way the fluid to be pumped can be contaminated. The drive shaft is optionally available in Hastelloy C4 for use with acids and alkalis. Stainless steel pump tubes have FEP coated seals.

New: Stainless steel pump tubes in PURE version. All materials coming into contact with the pumped fluids are physiologically safe. The pump tubes are mainly used in the food-, cosmetics and pharmaceutical industry.

Logical decision: Service-friendly design

Maintenance without the need for special tools – that's what we call service-friendly.

Important!

A stainless steel pump tube and an explosionproof motor with Atex certification must be used for pumping easily inflammable liquids. Please refer to pages 31-32.

Lutz Pump Power

Choice of motors

Small but very useful

Undemanding universal motor designed for industrial applications and suitable for pumping thin-bodied, slightly viscous, neutral, aggressive and non-inflammable liquids. It demonstrates its power even when handling acids and alkalis.

EMV DVE GS CE IP 24

MI 4/MI 4-E

Lightweight but dependable

The convenient and powerful MA II universal motors. Ideal for pumping thin-bodied to slightly viscous, aggressive and non-inflammable liquids.

EMV DVE GS CE IP 54

MA II

Safety first

These motors aren't taken aback easily. The ME II explosionproof universal motors are the nostrum - German Patent DE 38 15427 C2-for pumping a large variety of thin-bodied, easily inflammable and combustible liquids.

Ex IP 54 CE

ME II

Trio grande: The models

Three different versions of the MD compressed air motors are available. MD-1 without manual operation for automatic control, MD-2 with manual operation and interlock, MD-3 with on/off bushbutton. Approved according to Atex Ex II 2 G.

MD-1

MD-2

MD-3

Ex CE

MD-1/MD-2/MD-3 compressed air motors

Tip

For detailed information on the motors please refer to pages 30-32.

Reliable and powerful, thus suitable for extreme conditions

The B4/GT has a proven record of success in plant constructions and as a drum pump drive. The perfect system for thin-bodied to slightly viscous liquids. These "undemanding" partners hardly ever show signs of wear. The ideal solution for long periods of operation.

CE IP 54/IP 55

B4/GT three-phase gear motor

Lutz Drum and Container Pumps

Container Pump B50

Container Pump B50

The solution you can safely rely on

Great development: Container pump

Safety, fast, economically: container pumps convince in the liquid transfer by low wear, high delivery rates and fast emptying. The model B50 is the functional answer to changed requirements in practice to the trend to ever larger bundles – up to 1200-litres-containers.

- ✓ Easy and fast disassembly
- ✓ Convenient to clean
- ✓ Smooth running
- ✓ High pump capacity
- ✓ Short emptying times
- ✓ Low degree of wear
- ✓ Ease of handling
- ✓ Few components
- ✓ Low weight, mobile unit
- ✓ Convenient Lutz hand-wheel for disconnecting the motor and for use as a handle
- ✓ Due to the adapter, it can be attached to almost any container filler neck
- ✓ Driven by a powerful capacitor start motor (230 V, 50 Hz, with a 5-m connecting cable and plug)

Responsible Care

The B50 container pump, is the contribution of Lutz to "Responsible Care". Responsible Care is the chemical industry's voluntary commitment to continual improvement in all aspects of health, safety and environmental (HS&E) performance and to openness in communication about its activities and its achievements.

Practice-oriented design

These pumps meet all criteria for an optimal emptying of container by their vertical wet-set-up design. Thus also the necessity for floor drains is void – thereby fewer leakage risks. They are suitable for endurance run, have a low weight, work with low speeds and offer highest industrial safety.

The Lutz container pump is so conceived that it can almost immersed and fixed into each container opening without the necessity of adjustment. The advantages by the cartridge of the Lutz container pump B50 is in the cost reduction by fast emptying, in the omission of redundant hose connectors and an improved environmental protection.

Lutz Drum and Container Pumps

Container Pump B50

Simplicity and maximum working safety

Bulk chemical transfer or filling is made light work of with the B50 with flows up to 200 l/min. and quick installation.

The B50 is constructed along the lines of a drum pump in order to maintain the proven features. These include: long life, reliability, low maintenance, reduced downtime, process and transfer time savings and not least enhanced safety and efficiency.

The vertically mounted pump runs at low speed with a direct coupled motor. The motor is secured with the Lutz hand wheel for quick assembly and disassembly, and with power to cover densities from 1.0 to 1.9 kg/dm³ and viscosities up to 100 mPas without penalty. The pump is positively mounted into the container with a specially designed adaptor.

The pump is designed and constructed with proven centrifugal hydraulics guaranteeing stable performance characteristics.

The single robust housing design with an immersion depth of 1100 mm successfully achieves weight reduction and the minimisation of parts.

Product detail

Container pump		B50 PP/HC	B50 PP/SS
----------------	--	-----------	-----------

Category 1 / 2 (acc. to ATEX)		no	no
Immersion tube diameter:	max. mm	100	100
Temperature of medium:	max. °C	40	40
Material:	Pump tube	PP	PP
	Impeller/diffuser material	PPO / PPE	PPO / PPE
	Drive shaft	Hastelloy C (2.4610)	Stainless steel (1.4571)
Outrun piece:		G 1 1/2 Outer thread	G 1 1/2 Outer thread
Length: 1100 mm	Order No.	0180-001	0180-501

Choice of motors	Operating data
------------------	----------------

Single phase motor			
Output:	0.55 kW 0.75 kW	Flow rate* up to l/min.	200
Density:	up to 1.3 kg/dm ³ up to 1.8 kg/dm ³	Delivery head* up to m wc	22
Speed:	2800 1/min. 2700 1/min.	Viscosity up to mPas	100
Prot. class:	IP 54 IP 54	Weight (kg) Motor + pump tube	10.5 – 13.5
Order No.	0180-030 0180-031		

*Determined with water at 20 °C

Container Pump B50

for bulk transfer of chemicals

Materials (coming into contact with the pumped medium):

Version:	B50 PP/HC	B50 PP/SS
Pumpwerk:	Polypropylen (PP)	Polypropylen (PP)
Lauftrad / Leitrad:	PPO / PPE	PPO / PPE
Mechanical seals:	Carbon / SiC / HC	Carbon / SiC / HC
Sekundärdichtung:	FPM (EPDM)	FPM (EPDM)
Drive shaft:	Hastelloy C (2.4610)	Hastelloy C (2.4610)

Suitable accessories:

Flow meter for easy volume preselection

With the modular flow meter system Lutz offer an economic solution for safe and rational volume measurement of your liquids. Flow meters, type ST and SL, convince by their easy operation, compact construction and easy connection to the container pump. By using a relay module easy volume presetting is possible. For more information, please refer to separate flow meter leaflet.

Suitable range of accessories
see page 93

Accessories Lutz Drum and Container Pumps

„Getting started“

The main image shows a close-up of a Lutz drum pump's central vertical shaft and various connection points. The pump is mounted on a red drum. Several accessories are shown in inset images on the left side of the pump:

- A spray nozzle with a trigger handle.
- A yellow emission-proof drum adapter.
- A cylindrical metal foot strainer.
- Two hoses, one black and one grey.
- A red and black flow meter.

Perfectly equipped with the range of Lutz accessories

In keeping with our philosophy of making life safe and simple, we have a complete range of accessories available for you suitable for both mobile and stationary applications. The range of Lutz accessories makes your pump a perfect filling system.

Available e.g. are:

- Nozzles
- Hoses
- Emission-proof drum adapters
- Flow meters
- Foot strainers
- Installation flanges
- and much more

The full range of Lutz accessories caters to your specific needs.

Accessories

Emission proof drum adapters

To permit reliable application, emission protection for „on site“ pumping operations must be made as convenient as possible under practical conditions. The Lutz EMIGA system achieves more for the user while involving less work:

- ✓ All that is needed is a single drum adapter with two integrated valves.
- ✓ Due to „active seal“, emission protection is guaranteed even in the event of wear and tear, damage or pump tube diameter tolerances.
- ✓ The lower part of the adapter can be adapted to varying thread and diameter sizes in container openings.
- ✓ Simple installation using a plug-in-connection for individual adaption.
- ✓ Stability ensured by integrated spring loaded mechanism.
- ✓ Suitable container cup for container emptying available.
- ✓ Larger dimensioned air valves cater for pressure equalisation by the fast emptying of containers.

Product detail

Specification

Order-No.

9 Emission proof drum adapter

To prevent emission of dangerous gases when using a drum pump, so protecting the operator, the environment and the drive motor from hazardous, aggressive gases and vapours. Two venting valves ensure pressure compensation between inside of the drum and surrounding atmosphere.

Connection for gas displacement pipe: G 3/8; Screw-in thread: G 2 outer thread

Seals: FPM or EPDM.

Other threads and seal materials on request.

Material:	Pump tube diameter:	
PP	41 mm	
PVDF	41 mm	
Brass	41 mm	
Stainless steel	41 mm	

0204-250
0204-465
0204-252 ●
0204-253 ●

Following special threads are available

PP, Messing, Edelstahl	Tri-Sure 2", BCS 56 x 4 OT, Mauser 2", BCS 70 x 6 OT
Messing, Edelstahl	M 64 x 4 OT

Air valve for emptying of containers (additional costs see price list)

0204-364

Container cap

 DN 225

0373-060
0373-061

● Suitable for transferring combustible and easy inflammable liquids (e.g. ethanol, petrol) or in explosive hazard area.

EMIGA: emission proof drum adapters with gas displacement system

Concern about air pollution has never been so widespread as it is today. Acting on its sense of environmental responsibility, Lutz has further developed its emission proof drum adapter as a complete gas displacement system. Harmful gases and vapours created when transporting hazardous media remain practically in a closed system while themselves ensuring the necessary pressure compensation.

- ✓ Prevents emissions of harmful gases and vapours when filling **and** emptying.
- ✓ Protects the operator as well as the environment from noxious, toxic and/or severely oxidising emissions.
- ✓ All advantages of the reliable Lutz-EMIGA-system will be maintained.
- ✓ For flexible operation with nozzle or stationary operation by fixed union.
- ✓ A check valve integrated into the gas displacement pipe, prevents the gas from back-flow at standstill of the pump.

Specification

Order-No.

Product detail

Gas sealing kit with union for stationary operation

Reliable connection by fixed union on the container.
Stop valve and fast-action coupling ensure as fast and safe changing of drum.

Gas sealing kit with union

comprising of:
Stop valve, connection fittings, sealing plug, drip-free fast action coupling closing on two sides, hose connection with wing nut

Shown in addition here:
Emission drum adapter stainless steel

Gas sealing hose:
PVC-hose DN 9

0204-202

0204-253

0373-153

Other emission proof drum adapters see page 84

Accessories

EMIGA: for safe handling of hazardous liquids

Product detail	Specification	Order-No.
	<p>Gas sealing kit with nozzle for flexible operation</p> <p>The sealing plug adapts on different drum and container openings (D = 40-75 mm). Combined with a nozzle a safe transferring even into small vessels ist possible. A valve integrated into the gas displacement pipe, prevents the gas from back-flow at standstill of the pump or changing the drum.</p> <hr/> <p>Application with pump tube SS 41 and nozzle SS</p> <p>Variable system for use with a nozzle in such areas as fuels and solvents, etc.</p> <p>Gas sealing kit for nozzle</p> <p>comprises of: Conical sealing plug, check valve for gas displacement pipe, screw-in nipple with wing nut and connection piece, hose clamps</p> <p>Shown in addition here: Emission proof drum adapter stainless steel Other emission proof drum adapters see page 84 Nozzle stainless steel, G 1 1/4 Gas sealing hose: PVC hose DN 9 Alternatively for flammable liquids: Solvent hose DN 9 Emission proof hose (serving to return with sealless pump tubes arising gases back into the container)</p>	<p>0204-201</p> <p>0204-253</p> <p>0204-370</p> <p>0373-153</p> <p>0374-415</p> <p>0204-272</p>
	<p>Application with pump tube SS 41 and automatic nozzle Alu</p> <p>In conjunction with an automatic nozzle, the flow rate is cut off automatically when the maximum level is reached.</p> <p>Gas sealing kit for nozzle</p> <p>comprises of: Conical sealing plug, check valve for gas displacement pipe, screw-in nipple with wing nut and connection piece, hose clamps</p> <p>Shown in addition here: Emission proof drum adapter stainless steel Other emission proof adapters see page 84 Automatic nozzle in aluminium DN 25, seal PTFE Discharge pipe cpl. for automatic nozzle Alu (necessary when using a valve pad) Gas sealing hose: PVC hose DN 9 Alternatively for flammable liquids: Solvent hose DN 9 Emission proof hose (serving to return with sealless pump tubes arising gases back into the container)</p>	<p>0204-201</p> <p>0204-253</p> <p>0372-245</p> <p>0204-274</p> <p>0373-153</p> <p>0374-415</p> <p>0204-272</p>

EMIGA: emission proof drum adapters with gas displacement system, drum adapters, installation flanges

Specification	Order-No.	Product detail
<p>Application with pump tube PP 41 und nozzle PP Prevents emissions when handling severely oxidising or fuming acids and alkalis.</p> <p>Gas sealing kit for nozzle comprises of: Conical sealing plug, check valve for gas displacement pipe, pipe fitting</p> <p>Shown in addition here: Emission proof drum adapter PP Nozzle PP/FPM (FPM) G 1 1/4 Nozzle outlet spout PP Gas sealing hose: PVC hose DN 9</p> <p>Additional costs: Emission proof hose with connection flange PVDF* (serving to return with sealless pump tubes arising gases back into the container)</p> <p><small>*in connection with a new pump tube</small></p>	<p>0204-510</p> <p>0204-250</p> <p>0204-380</p> <p>0204-297</p> <p>0373-153</p> <p>0204-511</p>	
<p>10 Drum adapter in PP Drum adapter for continuous pump tube diameters. For fixing the pump in the drum opening. Outer thread G 2</p>	<p>0208-007</p>	
<p>10 Drum adapter in ST 37 Separable drum adapter for pump tubes with enlarged pump foot. For fixing the pump in the drum opening. Thread G 2 and M 64 x 4</p>	<p>0204-215</p>	
<p>10 Drum adapter in steel, galvanized For fixing the pump in the drum opening. Outer thread G 2 For mixing pump tube PP</p>	<p>0208-013</p>	
<p>10 Drum adapter PE (electrically conductive) For fixing the pump in the drum opening. Outer thread G 2 Outer thread BCS 56 x 4 Outer thread BCS 70 x 6</p>	<p>0208-055 0208-052 0208-054</p>	
<p>11 Installation flange For fixing the drum and container pump according to DIN 2573, DN 50, PN 6 to a companion flange. The flange is welded onto the pump tube.</p> <p>Material: For pump tube:</p> <p>PP ø 41 mm PVDF ø 41 mm Alu ø 41 mm SS ø 41 mm</p>	<p>0110-191 0122-001 0132-120 0151-622</p>	

Accessories

Foot strainers, pump security rack, discharge spouts, wall bracket, clamping device, oval gear flow meter

Product detail	Specification	Order-No.																
	<p>12 Foot strainer Available in PP, PVDF and stainless steel, for mounting on the pump foot. Keeps impurities away from the rotating parts.</p> <table border="0"> <tr> <td>Material:</td> <td>For pump tube:</td> <td></td> </tr> <tr> <td>PP</td> <td>PP Ø 41 mm</td> <td>0343-177</td> </tr> <tr> <td>PVDF</td> <td>PVDF and Alu Ø 41 mm</td> <td>0343-187</td> </tr> <tr> <td>Stainless steel</td> <td>SS Ø 41 mm</td> <td>0204-617 ●</td> </tr> </table>	Material:	For pump tube:		PP	PP Ø 41 mm	0343-177	PVDF	PVDF and Alu Ø 41 mm	0343-187	Stainless steel	SS Ø 41 mm	0204-617 ●

● Suitable for transferring combustible and easy inflammable liquids (e.g. ethanol, petrol) or in explosive hazard area.

Specification	Order-No.	Product detail
<p>16 Electronical flow meter, TR series</p> <p>For easy and precise flow rate measuring of various liquids. Ease of handling, compact design and ideally to combine with all drum and container pumps (connection G 1 or G 1 1/4), available in polypropylene (PP) or polyvinylidene fluoride (PVDF).</p> <p>For more details see separate flow meter leaflet.</p>		
<p>16 Modular electronical flow meter system, TS series</p> <p>For metering all kinds of liquids. Wide range of applications: Directly at the drum pump, remote or in-line operation possible. Convenient pre-setting of required volume using a touch screen display. Multilingual menus and simple plain-text operation. A comprehensive range of system components offers practical problem solutions.</p> <p>For more details see separate flow meter leaflet.</p>		
<p>19 Lifting device</p> <p>To simplify the process of lifting the pump in and out of drums and containers.</p> <p>For motors MA II and ME II For motors B4/GT</p>	<p>0211-047 0214-196</p>	
<p>34 Hoist</p> <p>for drum pump, with infinitely adjustable load balancer for easy lifting and moving of the pump.</p> <p>Load bearing capacity: 10-14 kg Tackle: 2 m</p>	<p>0371-012</p>	
<p>Connecting cable</p> <p>For extension of the connecting line for universal motors, 2 or 3-wired (three-phase motors 4-wired). According to requirements the cable is available in every necessary length.</p> <p>H05 RN-F, 3 x 1 mm² for motor MA II H07 RN-F, 2 x 2,5 mm² for motor MA II (42 V, 24 V) H07 RN-F, 3 x 1,5 mm² for motor ME II H07 RN-F, 4 x 1,5 mm² for three-phase motors</p>	<p>0466-000 0466-003 0336-074 ● 0336-339 ●</p>	
<p>Cekon-plug</p> <p>5-pole - 16 A For three-phase gear motors B4/GT</p>	<p>0336-415</p>	

Accessories

for explosion proof applications

Product detail	Specification	Order-No.
	<p>20 Equipotential bonding cable Serves to create electrically conductive connection between explosion proof pump and container as earthing and equipotential bonding function.</p> <p>2 m long with fastening clip</p>	<p>0204-994 ●</p>
	<p>21 Ex-plug CEE round plug in accordance with EEx de IIC T6, splash proof in compliance with IP 65.</p> <p>3-pole (alternating current) CEAG for motor ME II 3-pole (alternating current) STAHL for motor ME II</p>	<p>0336-536 ● 0336-540 ●</p>
	<p>22 Ex-socket CEE-socket in accordance with EEx de IIC T6, splash proof in compliance with IP 65.</p> <p>3-pole (alternating current) for motor ME II 3-pole (alternating current) STAHL for motor ME II</p>	<p>0336-531 ● 0336-542 ●</p>

● Suitable for transferring combustible and easy inflammable liquids (e.g. ethanol, petrol) or in explosive hazard area.

Accessories

for compressed air supply of motors MD-1, MD-2 and MD-3

Specification	Order-No.	Product detail
		
<p>25 Maintenance unit For cleaning and oiling the supply air. With manometer for setting operating pressure.</p> <p>Operating pressure: max. 10 bar</p>	0204-152	
<p>26 Coupling (female part) Self-disconnecting in brass. For screwing in the maintenance unit.</p> <p>G 3/8 outer thread</p>	0372-154	
<p>27 Nipple (male part) In brass G 3/8 outer thread</p>	0372-045	
<p>28 Air hose coupling connector For connection to a coupling.</p> <p>For compressed air hose DN 9</p>	0372-155	
<p>29 Stop valve Chromium-plated brass for regulating the compressed air as well as the speed of the compressed air motors.</p> <p>G 3/8 outer thread/inner thread</p>	0372-043	
<p>30 Compressed air hose PVC-hose with intermediate woven layer, DN 9, for air supply to compressed air motors.</p> <p>Operating pressure: max. 14 bar at 20 °C</p>	0373-153	
<p>31 Hose clamp (Chromated steel: 1.4016)</p> <p>For compressed air hose DN 9</p>	0301-156	
<p>32 Coupling with hose connector (female part) Self-disconnecting in brass, with hose connector DN 9.</p> <p>For compressed air hose DN 9</p>	0372-166	

Accessories

for vegetable oil pumps

Product detail	Specification	Order-No.
	<p>Hose set SL-Bio Hose Slimline Bio with two textile braids and plain surface. Hose clamp and hose connection from polypropylene (PP) G 1 1/4 for assembly onto the pump tube or nozzle.</p> <p>Nominal diameter: DN 21 (7/8") 0.55 kg/m Length: 2.5 m Length: 4.0 m Length: 6.0 m</p>	<p>0205-805 0205-806 0205-807</p>
	<p>PP nozzle For filling and transferring. With hoop guard and two outlet spouts ø 23 mm (cylindrical) and ø 12 mm (conical). Polypropylene (PP) housing and valve tappet.</p> <p>Operating pressure: max. 3 bar at 20 °C Weight: approx. 0,5 kg Connection: outer thread G 1 1/4 Seal: FPM (FPM)</p>	<p>0204-380</p>
	<p>Drum adapter in PP Drum adapter for continuous pump tube diameters. For fixing the pump in the drum opening. Prevents the drum pump from tipping over in the empty drum. Thread G 2.</p>	<p>0208-007</p>
	<p>Container cap NW 150 NW 225</p>	<p>0373-060 0373-061</p>
	<p>Wall bracket For storage of drum pumps. This facility helps to protect pumps from damage, and maintains their value.</p>	<p>0204-308</p>
	<p>Oval gear flow meter MDO 1 For efficient flow measurement of mineral oils and alternative fuels. Easy handling, compact construction and quick assembly onto the pump.</p> <p>Measuring principle: Oval gear Range of measurement: 3 - 80 l/min. Range of viscosity: 1 - 2000 mPas Accuracy of measurement: ± 0,5% Connection: G 1 1/4</p>	<p>0211-600</p>

Accessories

for container pump B50

Specification	Order-No.	Product detail
<p>Lifting device To simplify the process of lifting the pump in and out of drums and containers.</p>	0155-154	
<p>Hose connection Hose connector with wing nut for connecting the hoses to the pump tube or nozzle.</p> <p>Material: Nominal diameter: PP DN 38 PP DN 32</p>	0180-161 0204-412	
<p>Reducing sleeve G 1 1/2 inner thread to G 1 1/4 outer thread for connection of a flow meter</p>	0180-167	
<p>Reducing sleeve G 1 1/2 outer thread to G 1 1/4 inner thread for hose diameter DN 38 when using a flow meter</p>	0180-169	
<p>Foot strainer Keeps impurities away from the rotating parts.</p> <p>Material: PP</p>	0180-174	
<p>Acid proof coating In aggressive atmosphere the three phase motor should be protected by a special acid proof coating. If customer requires, a special varnish is possible.</p> <p>Acid proof coating</p>	0006-516	
<p>PVC hose Fabric reinforced PVC hose for aggressive, non-flammable liquids.</p> <p>Operating pressure: max. 6 bar Temperature of medium: 0 up to +60 °C Nominal diameter: Weight: Suitable hose clamp: DN 38 (1 1/2") 0.6 kg/m 0300-460</p>	0374-431
